

Airbnb Listing Scorecard

A **15-minute, 100-point audit for hosts before lowering price.** Use this to find presentation leaks in your cover photo, first five photos, captions, copy, trust details, and competitor fit.

How to use it

1. Open your listing and three nearby competitors at a similar price.
2. Score each section honestly. Do not edit yet.
3. Write one sentence explaining each low score.
4. Pick the top five fixes before changing price.

Scorecard

Section	Points
Cover photo Does it create a clear reason to click? Does it show the strongest guest benefit?	/20
First five photos Do they explain the stay: main promise, sleep, living comfort, kitchen/usefulness, differentiator?	/20
Photo quality and honesty Are photos bright, straight, useful, accurate, and free from misleading edits?	/15
Title and opening copy Does the title name a specific guest benefit instead of generic adjectives?	/15
Captions and details Do captions clarify bed sizes, room use, views, workspace, access, limitations, and practical details?	/10
Trust signals Does the listing reduce uncertainty around cleanliness, check-in, noise, stairs, parking, and suitability?	/10
Competitor fit Does it look competitive beside three nearby alternatives without racing to the bottom on price?	/10

Score interpretation

- **80–100:** likely small improvements, not a full rebuild.

- **60–79:** meaningful presentation leaks; fix before discounting.
- **Below 60:** full listing order/copy/photo diagnosis is probably needed.

Top 10 fixes

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
